/// CATALOG DEVELOPMENT AND MAINTENANCE SERVICES

Stop reacting to your catalog. Start working with it.

Catalog Development and Management is essential to minimize risk in maintenance and operations. Without accurate information in your catalog, it's very likely that the wrong item can be ordered or installed. If that happens to the wrong part, at the wrong time, the results can be costly – and even dangerous.

Too often, companies react to their degrading data instead of implementing a strategy to optimize it for the long-term. They perform a complete, time-intensive cleanse of data, only to do it again in a couple of years. Asset Management Services (AMS) transforms your catalog, so it promotes efficiency instead of hindering it. What's more, we can continually manage data to ensure it stays consistent, reliable and accurate.

ACCURATE, COMPLETE DATA

Gain accurate, complete descriptions of stocked items, and minimize risk of ordering or installing the wrong item.

A PROACTIVE APPROACH

Because we excel at implementing processes and technologies that ensure long-term data quality remains high, its shelf life increases dramatically. That means expensive, difficult and time-consuming data-cleanse projects will be needed less frequently, if you need them at all.

AMS CATALOG DEVELOPMENT AND MAINTENANCE SERVICES AND CAPABILITIES

AMS offers a wide array of Catalog Development and Maintenance services. Like all of our services, they can be customized according to your specific needs:

CATALOG DEVELOPMENT

AMS helps develop your catalog, cleanse data or perform catalog conversions. We manage the entire process, including cross-departmental activities, to drive on-time completion and ensure accurate, functional data that meets your specific needs.

CATALOG CONVERSIONS

Whether you are changing your existing catalog or migrating to an entirely different system, AMS has the expertise necessary to ensure a smooth transition. Our knowledge of standards, processes, issues, techniques and industry providers enable significant time savings and high-quality results.

CATALOG REVIEWS AND UPDATES

AMS can review and update catalog descriptions and specifications, ensuring accurate information is recorded and duplicate items and/or descriptions are eliminated.

CATALOG MANAGEMENT

Whether we developed your catalog or not, AMS can manage your data long-term to ensure it stays consistent, reliable and accurate.

SMART CATALOG DEPLOYMENT

SmartCatalog searches your entire catalog record using the same technology as popular web search portals – so you can quickly find what you're looking for. The user-friendly "shopping cart" requisitioning function also streamlines the ordering process to save additional time.

LET AMS POWER YOUR CATALOG PERFORMANCE.

Contact AMS to learn more about how your company can boost its performance and efficiency through the power of improved data.
