/// EQUIPMENT BILLS OF MATERIALS DEVELOPMENT AND MAINTENANCE

You get out what you put in.

Good maintenance demands good information. If your technicians can't find what they need to do the job, do it right and do it quickly, you can lose hours, days or weeks of valuable production.

Asset Management Services (AMS) Equipment Bills of Materials Development and Maintenance services provide you with the peace of mind, continued production and performance enhancement that comes from reliable, accurate maintenance information. AMS Bills of Materials define relationships from the highest level down to the smallest detail, including individual parts, catalog numbers and descriptions.

USEFUL INFORMATION

When AMS develops or maintains your Equipment Bills of Materials, you'll benefit from data that's fit for use the day it's completed – delivered within existing systems, in established formats. There is no learning curve or adjustment period. Information is presented within your systems, in a job-ready format and in language that maintenance personnel understand.

DETAILED INFORMATION

When you enlist AMS to build, cleanse or maintain your Equipment Bills of Materials, you'll get a hierarchical representation of every piece of equipment and all its parts. Bills of materials include individual parts, catalog numbers and descriptions, so technicians can quickly determine and find what they need for the job, and get it done.

AMS EQUIPMENT BILLS OF MATERIALS SERVICES AND CAPABILITIES

AMS will help you choose the right offering to meet your business goals, or develop specific programs that expand your potential for operations improvement. Equipment Bills of Materials Development and Maintenance services from AMS include:

PROJECT-BASED BILLS OF MATERIALS DEVELOPMENT

Develop accurate, functional Equipment Bills of Materials in concert with new construction for a smooth transition to the maintenance and operations phase. We can also quickly refine your existing Bills of Materials or give them a complete overhaul.

ONGOING BILLS OF MATERIALS MAINTENANCE

We can manage your Equipment Bills of Materials for continuously high performance levels, whether you bring us on board to maintain existing data or AMS develops them from the start.

DATA ENTRY QUALITY MONITORING

For ongoing accuracy, AMS can monitor discrete Computerized Maintenance Management System (CMMS) fields. With our monitoring, data stays up to date without disruptive, periodic data cleansing projects.

BUILD A BETTER BILL OF MATERIALS.

Contact AMS to learn more about how your company can boost its performance and efficiency through the power of improved data.
