

# P# 12-HSE08:

/// HEALTH, SAFETY AND ENVIRONMENT

## Zero days away from work, low incident rates. Year in and year out.

Protecting your workforce and the work environment is a moral responsibility as well as a financial one. That's why, since its founding, ASCI has been a proactive leader in Health, Safety and Environment (HSE). As a trusted partner for multinational asset-intensive companies, our standards must exceed those of governments, clients and suppliers.

Through our HSE focus, ASCI and its companies, Advanced Supply Chain International and Asset Management Services (AMS), have achieved a remarkable safety record.

### WHAT IT TAKES TO ACHIEVE "ZERO STATUS"

Our work is never so urgent or important that we cannot take time to be safe and environmentally responsible. Everything we do flows from that principle – policies, procedures, quality assurance, and client, supplier and employee relations.

### WE BRING OUR REMARKABLE RECORD TO YOUR SITE

- More than three million man-hours were logged without a Lost Time Incident.
- ASCI's Recordable Incident Rate is 0.6. OSHA reports that the U.S. National Average is greater than 6.0.
- ASCI is a recipient of the Alaska Governor's Safety Award.
- We've established an ISO 14000-compliant environmental management system.
- We actively pursue Voluntary Participation Plan (VPP) certifications at our operating sites.

## IT'S WHO WE ARE.

This isn't an add-on package we sell. We bring our HSE focus to every business relationship, every supplier contract, every transaction. ASCI's goal is to exceed each client's safety program and to positively impact the HSE culture everywhere we go.

### FOCUSED ON HSE

Our Health Safety and Environment culture protects workers and provides you with peace of mind.

- An adopted, enforced Safety, Health and Environmental Policy
- Annual written goals and objectives
- Daily safety meetings
- Communication of policies and objectives through team meetings
- Use of Job Safety Analysis, Behavior-Based Safety Observations, Task Hazard Assessment and Supervisor Advance Safety Audits. These allow ASCI to keep safety at the forefront.

### EMPLOYEE TRAINING

Our HSE training includes:

- Behavior-Based Safety Observations
- Personal Protection Equipment (PPE) Requirements
- Worker's Right to Know (MSDS)
- Ergonomic Workstation Adjustments
- Emergency Evacuation Procedures
- Site-Specific Safety Orientations
- Task Hazard Assessment

### SUPERVISOR TRAINING

Our supervisors receive additional training that includes:

- Supervisor Safety Training
- Root Cause Accident Investigations
- Environmental Management Systems Awareness
- Employee Stress Awareness

### ACCOUNTABLE AND COMMITTED

Over the course of many years of training dozens of HSE managers, we've discovered that it's often very effective to rely on an outside service provider to achieve industry-leading safety development, training and monitoring.

Having a supply chain management contractor with a strong HSE focus can mitigate risk. From our training to process to technology, the ASCI safety analysis and implementation program is many layers deep, and each layer provides its own protection. Our commitment to safety is our commitment to you.
